Quality Assurance

Your All-in-One Medical Solutions Provider !

OEM Process

We provide professional manufacturing technology to fulfill quality demands and services for our partners.

01

Client request

Realize the requests and budgets from customers and satisfy customer needs by experience and technology.

02

Communication

Evaluate the requirements to confirm the detail and the way of cooperation.

03

Signing of contract

Confirm the details of products and sign the contract.

04

Sample Testing

Produce the sample according to the drawing.

05

Mass production

Standard operating procedure after sample confirmation to ensure stable quality.

Global Locations

Our main markets are located in North America, Australia, Southeast Asia, Northeast Asia, Europe

Consistent Production

Comprehensive assurance of product quality and complete traceability with over 80% self manufacture.At the same time, we can promise long-term stable supply to our customers and meet customers' various customization requirements!

Machining

In addition to various complete processing equipment, the factory also has advanced robot welding arms to stabilize and improve welding quality, ensure its uniformity, and improve production efficiency.

Surface Treatment

Compared with liquid coatings, powder coatings can obtain excellent film adhesion, corrosion resistance and other coating properties.

Assembly & Test

Sufficient manpower and perfect education and training, repeated inspection and control to improve production efficiency.

Finished Goods

A lot of protection has been specially made on the packaging to prevent damage during transportation.

Home Care Bed

Bed and furniture for care at home

These beds have special features both for the comfort and well-being of the patient and for the convenience of health care workers. Common features include adjustable height for the entire bed, the head, and the feet, adjustable side rails, and electronic buttons to operate both the bed and other nearby electronic devices.

4 Motors Easy Assembling Multi- Function Home Care Bed

ENB-401K

Convenient Transportation

The new modular medical beds can be easily disassembled into smaller components, simplifying transportation and reducing associated costs and time. This added flexibility allows for efficient delivery to various locations, making it easier to serve patients in different settings.
